

Case Study – Windsor HS

Helical Piers for New Construction and Tecco Mesh Soil Retention

PROJECT SUMMARY

CLIENT – GH PHIPPS CONSTRUCTION

ARCHITECT – DLR GROUP

ENGINEER – JVA CONSULTING & MAGNUM GEO-SOLUTIONS

GEOTECH – EARTH ENGINEERING CONSULTANTS

Park Range was hired by GH Phipps Construction to install 77 Magnum 3" galvanized tubular helical piers to an average depth of 32LF. In addition we underpinned interior columns and installed 29 soil nails, providing temporary shoring with Tecco Mesh Soil Retention for the interior pool renovation. We worked on a critical path schedule by phases.
