

MOUNTAIN VIEW FIRE RESCUE • ERIE, CO

Fire Station No. 15

2285 Meadow Sweet Lane, Erie, CO 80516

Micropile foundation for structural slabs.

10

MICROPILES

4½"

PILE DIAMETER

32 ft

MAX DEPTH

60 kips

LOAD TEST

2.0

FACTOR OF SAFETY

Project Overview

Fransen Pittman selected Park Range Construction to install the micropile foundation for the structural slabs at Mountain View Fire Rescue's Fire Station No. 15 in Erie. Our crew installed 10 vertical micropiles to depths of up to 32 feet, tied them into new concrete pile caps and grade beams, and verified capacity with load testing to 60 kips.

Scope of Work

- 10 vertical 4½" micropiles drilled to depths up to 32 ft
- 2 piles drilled with a man-portable rig
- Remaining piles drilled with a skid-steer-mounted rig
- Load tested to 60 kips for a factor of safety of 2

PROJECT SUMMARY

OWNER	Mountain View Fire Rescue
CONTRACTOR	Fransen Pittman
STRUCTURAL	Martin/Martin
GEOTECHNICAL	Kumar & Associates, Inc.
PILE DESIGN	Straight Edge Construction Services (Ryan Beck), stamped submittals
ARCHITECT	OZ Architecture, Inc.
FOUNDATION	10 vertical 4½" micropiles
COMPLETED	July 2026

Park Range crew and drill rig on the Erie site.

MOUNTAIN VIEW FIRE RESCUE • MEAD, CO

Fire Station No. 14

2996 Liberty Drive, Mead, CO 80542

Micropile foundation for structural slabs.

12
MICROPILES

4½"
PILE DIAMETER

32 ft
MAX DEPTH

60 kips
LOAD TEST

2.0
FACTOR OF SAFETY

Project Overview

For Mountain View Fire Rescue's Fire Station No. 14 in Mead, Fransen Pittman also turned to Park Range Construction for the micropile foundation supporting its structural slabs. Our crew installed 12 vertical micropiles to depths of up to 32 feet, tied them into new concrete pile caps and grade beams, and verified capacity with load testing to 60 kips.

Scope of Work

- 12 vertical 4½" micropiles drilled to depths up to 32 ft
- Threaded pile tops fitted with bearing plates and cast into new concrete pile caps and grade beams
- Load tested to 60 kips for a factor of safety of 2
